

**WeedMat Coir Fibre** IN-WM-36.5mR

Made from organic coconut fibres and natural latex, these OMRI-listed mats are suitable for most vine, shrub and tree crops. As well as reducing or eliminating the need for hand weeding, they help prevent wind-borne weeds from growing. They also even out the soil temperature for surface roots - keeping them cooler in summer and warmer in winter.

TECHNICAL ANALYSIS		
Property	Parameters	Value
Physical Analysis	Size of Mat	36.5cm
	Shape of Mat	Round
	Thickness	6 - 8mm
	Density	800g/m <sup>2</sup>
Product Characteristics	Weight per Mat	160g
	Organic Latex	Double Sided
	Dripper Holes x 4	60mm
	Centre Hole	50mm

Loadings	Mats per Carton	120
	Cartons per Pallet	24
	Mats per Pallet	2,880
	Pallets per 40'HC	20
	Mats per 40'HC	57,600
	Metric Tonne/40'HC	9.2MT

**FEATURES**

Galuku Latex Weed Mats reduce evaporation:

- extending the time between watering
- minimising fertiliser loss
- preventing the build up of surface salts.

Beneath these long-lasting, hard-wearing mats are the perfect conditions for beneficial microorganisms that work towards improving the root zone, to provide better crop outcomes.

Manufactured by Galuku India
